

The Play Space is an Integrative and Experimental Service for early childhood which responds to the need to offer flexible and differentiated opportunities, adaptable to the needs of families and children, education and socialization for children from 12 to 36 months.

It is a service directly managed by the Municipality of Verona that is part of a pre-existing structure, going to enhance and signify the spaces currently available, in an approach to the construction of the Integrated System Zerosei.

This service fits into the family organization and the daily experience of the child in a different way from the nursery or the spring section, but it calls for just as much educational attention to accompany the development of its competences and to ensure a smooth transition from one to another of its worlds.

This is a service, aimed at children from 12 to 36 months who do not attend the Nursery and which provides attendance without food and sleep.

- The organization of day-to-day activities is designed to maintain the flexibility needed to achieve the objectives of reception, inclusion and accessibility set out in the legislation and to enable research and pedagogical innovation.
- It offers girls and boys an educational space where they can experience the first experiences of socialization between peers and learn the rules of common life to facilitate entry into the Kindergarten.
- It wants to respond to the emerging needs of sociality and expansion of relations with other children and other educational figures.
- It aims to promote the development of children's expressive and creative abilities through the exploration of different languages.
- Girls and boys are protagonists of the relational context and main subjects of the actions of educators that promote and guide individual and collective growth processes through the organization of spaces and the proposal of materials and play experiences significant.
- Girls and boys have the opportunity to experience themselves in play experiences by finding opportunities to gain knowledge of themselves and others.
- Through the educational project, an educational community is created that supports the growth and development of children in common with their parents.
